

DESCRIPTION

PS-37[®] is a product formulated with penetrating and moisturizing surfactants, as well as fulvic acids. It improves soil conditions, along with the absorption of nutrients, and reduces the loss of water. **PS-37** works by breaking the tension at the surface of the water.

DOSAGE AND METHOD OF APPLICATION

Shake the container before opening, while wearing gloves.

To measure the required quantity, use a volumetric-graduated container. In order to dilute, add first the solvent and then the required amount of PS-37. This product is compatible with a majority of commonly used agrochemicals, however it is always advisable to do a compatibility test on a small sample. It should only be mixed with registered products in authorized crops.

DOSE	APPLICATION METHOD	APPLICATION TIME
6-8 lt/ha	Rolled irrigation	At each irrigation throughout the growing
4-6 lt/ha	Sprinkler irrigation	In every irrigation
1-4 lt/ha	Drip irrigation	At each watering or once a week at length of cycle

INTEGRAL TECHNICAL ADVICE

All our products must be used in conjunction with a balanced fertilization program. It is recommended to do an analysis, both soil and foliar, to achieve optimal growth and production. Consult our advisers at AGRONUTIRNTES DEL NORTE, S.A. DE C.V. for more information.
