DESCRIPTION

AMINO-GROW® is a complex of free amino acids of high solubility and phytohormones with immediate availability for the plant that can be applied in foliar or soil form. Foliar applications of **AMINO-GROW®** can be started at the time of transplanting or when the plants have the first pair of real leaves, diluted in the spray water necessary to cover the area to be treated, alone or combined with other agrochemicals.

DOSAGE AND METHOD OF APPLICATION

CROP	DOSE	APPLICATION METHOD	APPLICATION TIME
Grain	0.5 a 1.0 Lt/Ha	Rolled Irrigation	2 to 3 applications in the cycle at 15-day intervals
Vegetables	250 a 500ml/Ha	Foliar	In every fertilizer application *
Fruit trees	1 a 2 Lt/Ha	Drip or roll irrigation	Apply 3 to 4 times during the cycle

For best results, it is recommended to adjust the pH of the solutions from 5.5 to 6.5 or use a nonionic adhesive. Do the spraying avoiding the hours of high temperatures of the day. In grain crops it is recommended to make two to three applications in the cycle of 0.5 to 1.0 liters per hectare at intervals of 15 days .

AMINO-GROW is compatible with a majority of commonly used agrochemicals, however it is always advisable to do a compatibility test on a small sample. It should only be mixed with registered products in authorized crops.
