

## DESCRIPTION

**QUELAMÍN FIERRO®** is a concentrated liquid fertilizer —with EDTA, carboxylic acids and amino acids as chelating agents— of very high solubility. It provided iron in an organic form that makes it highly assimilable and usable by plants, whether in foliar or soil form. **QUELAMÍN FIERRO®** is an excellent source of iron to correct deficiencies in all crops in general, in fast and efficient way. The free amino acids in this formulation are absorbed immediately and provide plants with iron in a much more useful and profitable way, increasing the energy of the plant and consequently reducing the metabolic wear of the metal process. Iron is an essential microelement and is considered an important component in the enzymatic system of the plant, as well as in respiration and energy transport. Iron is a component of proteins used in the splitting of nitrates and sulfates, nitrogen assimilation and energy production. It is also part of the chlorophyll molecule as well as protein synthesis and growth of root meristems.

## DOSAGE AND METHOD OF APPLICATION

Direct application to the ground: Using a backpack or mechanical equipment, it is recommended to use 1 to 5 liters per hectare for all crops. Apply the number of times necessary within the cycle in crops with sprinkler or drip irrigation.

Foliar application: It is recommended 0.5 to 4 liters per hectare per application. It may be accompanied with foliar fertilizers. These applications can be made whenever the crops requires it or according to a nutritional program for stress conditions; as well as when application of growth regulators or insecticides is being made.

## ADVANTAGE

It is a concentrated liquid fertilizer of very high solubility.

Important component in the enzymatic system of the plant, as well as in respiration and energy transport.

Protein component used in the splitting of nitrates and sulfates, nitrogen assimilation and energy production.

It is part of the chlorophyll molecule as well as protein synthesis and the growth of root meristems

## INTEGRAL TECHNICAL ADVICE

All our products must be used in conjunction with a balanced fertilization program. It is recommended to do an analysis, both soil and foliar, to achieve optimal growth and production. Consult our advisers at AGRONUTRIENTES DEL NORTE, S.A. DE C.V. for more information.
